Weather

Client understands that tents are temporary structures designed to provide limited protection from weather conditions, primarily sun and rain; however there may be situations, particularly those involving strong winds and lightning, in which the tents will not provide protection and may even be damaged or blown over. Evacuation of tents to avoid possible injury is recommended when severe weather threatens the area where the tents are erected. People must leave the tents and not seek shelter in tents during such conditions. It is best to evacuate when in doubt. Marquee Tent offers an on-sight technician during the event for an additional charge to assist with weather assessment and equipment maintenance. If Client declines those services, Client understands that it is Client's responsibility to be aware of changing weather conditions and to exercise its best judgment with regard to the evacuation of tents.

Client agrees that in the event of a predicted or actual storm or excessive winds, Marquee Tent may dismantle any equipment that has been previously installed to ensure safety of all involved.

Indemnification & Defense

Client agrees that if any legal proceedings are brought against Marquee Tents to recover compensation for injuries to individuals or damages to personal property occurring in connection with the event Client will provide a defense for Marquee Tent and any of it's employees named in such proceedings and will indemnify Marquee Tents and it's employees for any judgment rendered against them.

Tent Installation

Installation of a tent must be done correctly for the protection of the users, the tent, and ultimately the success of your event. Therefore, it is our strict policy that all installations and takedowns are done by our experienced crews. All prices quoted will include these services.

Preparation for Installation and Takedown

The first step our crews take installing a tent is to spread it flat on the ground where it is to go up. Please have the area completely clear of obstructions before we arrive at the job-site. In like manner, the tent must be totally empty before we can take it down. Fees will be applied if these policies are not met. The tent crew must be notified of any under ground water, electrical or sewage lines.

Asphalt Installation

Erecting a tent on an asphalt surface is a routine operation requiring that we drive iron stakes approximately 3ft. long and 1in. in diameter through the surface. We fill the holes with ready-mix asphalt immediately after the stakes are removed. There will be minimal damage to the asphalt.

Concrete Installation

When a tent is installed on a concrete surface, stakes cannot be used. We must drill holes through the concrete and screw in eye-bolts. We guy ropes to the eye-bolts to anchor the tent. Upon removal, we remove the eye - bolts and leave shields to fill the holes. We charge \$5.00 per hole for this service.

Water Barrel Installation

This process is offered but not a preferred form of securing a tent. In the case of severe weather, water barrel installation cannot be used.

Permits

It is the responsibility of the renter to check with your Building Permit and Fire Departments prior to the installation date to confirm the requirement of permits. We will assist you in any way possible, but these clearances do remain the responsibility of the renter.

Damages & Damage Waiver

Marquee Tent does its best to protect your property during the delivery, installation and removal process. Client agrees to release MT of any liability for any damage to any property due to delivery, installation and removal of equipment on your property. This includes but is not limited to ruts in grass, scratches or cracks on the installed surface, and high wind related damages. Client also understands that tents are temporary structures and may leak during heavy rain.
